ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

(54) Title: METHOD AND MEANS FOR THE EMISSION OF AN AIR CURRENT IN THE DIRECTION OF THE BREATHING  
ZONE OF A USER

(57) Abstract: A method and means for the emission of an air current in the direction of the breathing zone of a user (10) of, for instance, an airplane seat. Sound is emitted from a sound emitting position (a, b) adjustable by the user. An air current is emitted from an air emitting position (c, d) which is fixed relative to the respective sound emitting position (a, b) in accordance with the mutual position of the breathing zone relative to an ear of the average user. The user brings the sound emitting position in accordance with the position of his/her ear (11, 12) by optimization of the received sound, so that the air current too is emitted in the proximity of and in the direction of the breathing zone of the user.
